

Ma'ālim — Review pack for the Sharia reviewer

Generated 2026-10-06 from the project files (commit b55e154). Reviewer name:

_____ Date: _____

What this is. Everything in the app that a person with Sharia knowledge must read before it can reach a learner. Nothing below is shown to learners until you approve it. For each row tick *Approve*, *Edit* (write the corrected text) or *Reject*.

What the app never does. It does not write Quran, hadith or rulings, does not give personal rulings or fatwas, and does not answer questions it classifies as differing views (L3) or personal / sensitive (L4): it hands them to a person.

Who wrote what. Wording marked *drafted by the assistant* was drafted on the owner's instruction from concept titles only and makes no religious claim, but you decide. Quotations and sources are never written by the assistant: they are copied verbatim from the source sites and shown for you to check.

A. Curriculum (order, levels, prerequisites)

Levels: L1 core beliefs · L2 settled practical rulings · L3 differing scholarly views (the app refers) · L4 personal / sensitive / fatwa / out of scope (the app abstains).

Still to be supplied by a person (they state what Islam says, so they are not drafted): the "common misunderstanding and its fix" for each unit, and each unit's check question. They should be derived from the verified passages in section E.

B2. Hand-off wording (shown when the app refers a question to a person)

Status in the file: verified = false, reviewer = none. Until you approve, the app uses its built-in neutral wording (section B3).

C. Question router (what the app answers, refers or declines)

C2. Labelled test questions (91) — please correct any wrong label

"Expected" is the label in the test set (ids 1–30 from the starter pack, others written by the implementer: all are drafts). "App result" is what the router does today. A mismatch or a wrong expected label matters most.
